

FOR IMMEDIATE RELEASE

California registration granted to Quali-Pro® Propiconazole 14.3% fungicide Raleigh, NC – February, 2007 — Quali-Pro brand products announce the arrival in California of their post patent equivalent of Banner Maxx®, *Propiconazole 14.3%* fungicide.

Propiconazole 14.3% is a broad-spectrum disease control for cool and warm season grasses, trees, shrubs and flowers. The micro emulsion formulation provides a less odor product with better tank stability and excellent plant coverage. The systemic mode of action insures the long-lasting disease control California superintendents, PCA's and landscape professionals are looking for.

“Propiconazole is another product we are adding to our constantly growing portfolio of products available to the California market,” states Russ Mitchell, Product and Marketing Director for Quali-Pro products. “With the California approval of our Propiconazole product, we can now offer a practical choice to customers who need reliable disease control in a wide variety of applications.”

Backed by the full support of their parent company, Makhteshim-Agan Industries (MAI), the world's leading manufacturer and distributor of post-patent agrochemicals, Quali-Pro offers a comprehensive selection of herbicides, fungicides and insecticides to the California marketplace.

Like all the Quali-Pro products, Propiconazole is produced according to Makhteshim-Agan's high level of technological-chemical competencies and in adherence to the strictest environmental standards.

To find out more about the Propiconazole from Quali-Pro, the full product line, or distributor locations, please visit www.quali-pro.com or call 800-979-8994.
